

Moisturize 🌀💧💧 Anti-Wrinkle Skin Firming Hydrator

FAQ's:

What percentage of peptides does Moisturize contain?

Moisturize contains a total of 15% peptides, a total of four that help increase collagen production.

Can Moisturize be applied to the facial area?

Moisturize is very appealing as a treatment due to price and size but it does not contain as high of concentrations of peptides for wrinkles as Serum, Face, Power Lift, or HydroStem-6. It is designed for stretch marks, discoloration or sagging skin and thus contains more essential oils to infuse hydration into the skin and thus is not suitable for oily or acne prone skin.

Can Moisturize be used as a massage cream in the treatment room?

Yes. Mix Moisturize with power lift to your preferred consistency and massage into skin for a superior anti-aging experience.

Can Moisturize be used while pregnant?

Yes. Moisturize will help prevent stretch marks as well as help reduce their appearance.
