

Lip Plumper Fuller Smoother

FAQ's:

Can I apply lip to the area above my lips to reduce wrinkles?

No. Lip will cause both immediate results and long term plumpness. It immediately plumps the lips by increasing blood flow and circulation to the surface. If applied outside the lip line, the area will turn red.

Will Lip burn?

No. Lip includes a non-irritating chili pepper that has been shown not too burn or irritate the skin.

Why is there only one color of Lip?

The Lip color enhances your own lip color and does not produce its own shade of color. It's designed to compliment your own skin tone.

Is Lip sticky?

A common comment about Lip is that it has just the right amount of glossiness, it is not overly sticky, and hydration lasts throughout the day even after glossiness fades.
