

Defy-Your-Age Beauty Awards 2010

Best anti-aging skin care products that really work

Best Day Cream with SPF

HydroPeptide SPF 30 Anti-Wrinkle Skin Enhancing UV Protection (\$40; hydropeptide.com)

You gotta love a moisturizer that hides redness and blotchiness and gives you a pretty glow—and our testers certainly did! But that unique feature (the result of pigment-filled spheres that adjust to your skin tone) is just one reason testers unanimously said they'd recommend this lightweight lotion to a friend. Its other winning attributes—long-lasting hydration, noticeably lighter brown spots, and decreased sensitivity—are due to an all-star lineup of rejuvenating ingredients. Among them: moisture magnets like glycerin; UVA-blocking zinc oxide; and vitamin B3 to quell irritation and minimize dark spots. In short, everything your skin needs to look youthful today—and years from now!

Use it right "Boost absorption by using an exfoliating AHA cleanser once or twice a week." suggests judae David J.
