Anti-Wrinkle Cellular Transformation Serum

FAQ's:

What percentage of peptides does Serum contain?

Serum contains a total of 30% peptides, a total of six, three of which are collagen-boosting peptides and three are wrinkle relaxing.

Are there any possible allergies?

Although allergies and reactions are not common, Serum contains whey protein. Those with Milk Allergy should test Serum for any possible reactions.

Does the HydroPeptide® facial have a facial massage cream?

Yes. Combine Serum with Tone for to create a facial massage cream that has good slip and provide superior rejuvenating properties.

Where is Whey Protein derived from?

Whey Protein is derived from bovine.

What are Growth Factors?

Growth factor are similar to peptides in that they are cell communicators and are responsible for cellular growth. Growth factors are a type of protein and they serve to regulate skin processes at the cellular level. These are recombinant growth factors that are engineered to act as human growth factors.

When do I apply Serum?

Serum should be the first product applied after cleansing. Moisturizers, SPF and makeup can be applied over Serum.
