AGE INTERVENTION® REGENERATION BOOSTER

Advanced Telomerase Enzyme Therapy

Aging skin is still a reality, but the key to aging may reside in the ability to stabilize telomeres by allowing cells to “reset their aging clocks.” Our extraordinary skin care compound captures the emerging science of topical Telomerase Enzyme as a realistic science-based option for dramatically younger looking skin.

Age Intervention Regeneration Booster combines Telomerase Enzyme in combination with anti-inflammatory agents, select peptides and other proven significant skin enhancing ingredients. An independent clinical study demonstrates measurable, significant and lasting improvements in the appearance of:

- Lines and wrinkles
- Elasticity
- Firmness
- Texture
- Discoloration
- Overall radiance, suppleness and hydration

Use Age Intervention Regeneration Booster in conjunction with your regular JMSR Skin Care Management System for flawless, healthy skin. Give your skin an immediate and long lasting “boost!”

Age Intervention Regeneration Booster

BEFORE

AFTER

TELOMERASE ENZYME

Telomerase enzyme is believed to be a major force in providing protection and stabilization to the telomere. As we age, our telomeres shorten and gradually visible changes related to aging begin to appear. By helping stabilize the telomere with the telomerase enzyme, we may be able to slow down the process of skin aging.

TRANSFORMING GROWTH FACTOR BETA-1

Transforming Growth Factor (TGF) Beta-1 acts as an intercellular mediator that signals certain cellular interplays necessary for maintaining healthy, young-appearing skin. TGF Beta-1 is highly anti-inflammatory and enhances production of a form of collagen that is no longer produced after the age of 30.

COENZYME Q10

CoEnzyme Q10 is a vitamin-like nutrient that resides in the mitochondrial cell membrane. It is a powerful antioxidant and anti-inflammatory that helps lessen the appearance of fine lines and wrinkles due to UV damage and helps protect skin from additional damage. Often referred to as a major “cellular energy source” that boosts the skin’s ability to repair and regenerate, the use of CoEnzyme Q10 enhances collagen and elastin production and aids in the production of hyaluronic acid.

RESET YOUR CELL'S AGING CLOCKS

NOBEL PRIZE**

For Telomere and
Telomerase Research

The 2009 Nobel Prize for Physiology or Medicine was awarded to three scientists who solved a major challenge in biology: how to protect chromosomes against degradation.

Question:

Is it recommended to use Age Intervention Regeneration Booster as a comprehensive skin care solution or as part of the Skin Care Management System?

Answer:

Our clinical studies showed significant improvement in a wide range of concerns associated with aging skin. That independent study was conducted with Booster only without supplemental products over the 8 week trial. However, most of our devoted Jan Marini users include the Regeneration Booster as part of their normal Skin Care Management System to enhance the clinical benefits they have come to expect by using our highly acclaimed multi-step daily program.

Question:

At what point do you apply Age Intervention Booster if you are using the Skin Care Management System?

Answer:

After you cleanse your skin (Step 1).

Question:

When can I expect to see the results of Age Intervention Regeneration Booster?

Answer:

Immediate hydration is commonly noticed by users of Regeneration Booster. Over the next 6 to 8 weeks from initial use there will be an increased appearance in softening of fine lines and wrinkles, along with improvements in firmness, radiance and skin's texture.

Question:

How long will Age Intervention Regeneration Booster last?

Answer:

Age Intervention Regeneration Booster is intended to be at least a 6 week program with the 6 included mini-bottles. We do find that many users get as much as 10 weeks of use from the Regeneration Booster depending on usage amount variation. It is recommended that the program is applied both in the AM and PM.

Question:

How often should I use the Regeneration Booster program?

Answer:

It is recommended to use a Regeneration Booster system to enhance your normal skin care program at least 2 times a year. However, many long term users of Regeneration Booster do not have periods of time of removing the product from their daily normal skin care regimen.

Question:

Should I apply the Regeneration Booster to entire face? Can I also use it on my neck?

Answer:

It is recommended you apply the Regeneration Booster very sparingly to entire face, and if desired, to the neck as well. You'll quickly realize that a very small volume will suffice to spread over a good portion of your face. After application, you should feel a hydration effect without any excess product remaining on surface of skin.

Question:

What skin conditions do Age Intervention Regeneration Booster address?

Answer:

The appearance of fine lines and wrinkles, elasticity, firmness, texture, discoloration and overall suppleness

Question:

What do I do if I experience skin irritation with use of the Booster product?

Answer:

This is a very rare complaint of the product as Booster is associated with a very user friendly (and mild) integration period. However, if irritation does occur we recommend you stop usage and consult with a physician and/or your skin care professional.

**Science-Based Compound for
Dramatically Younger-Looking Skin**

Read What Patients Are Saying About Age Intervention Regeneration Booster

"After just one week of using Age Intervention Booster I honestly felt like I looked five years younger. My significant other even asked me what I was doing different with my skin because I looked so young. I love the Jan Marini line, and can't tell you how much better my skin looks since I started using it. And that extra boost you get from Age Intervention Booster just makes it all better."

Samantha Aquilina

Phoenix, AZ

"I have had access to and used many different skin care products over my 30 years in working in dermatology and most recently in the age-management focused skin care industry. I have used Retin-A for many years and continue to do so. All that being said, Jan Marini's Age Intervention Regeneration Booster is the most outstanding product I have used. I have received more comments on how healthy and "good" my skin looks in the past month (since starting this product) than I have in years. I am 50-years-old. My skin looks healthier, the texture is smoother, hydrated and this gives a general "glow" to the skin that I have not seen with anything else. I intend to use the Booster as part of my daily skin care EVERYDAY . . . no breaks for me!!! This is a product well worth its weight in gold. It does make a difference in your skin and I truly believe I am receiving benefit at the cellular level, not just extra hydration as one does with many products. I can't recommend this highly enough!!"

Jan Pepper

Tulsa, OK

"After one week of using the Age Intervention Regeneration Booster along with my JMSR Skin Care Management System products, I noticed more of a glow and smoothness to my skin. I also started receiving many compliments from my coworkers and clients at the spa."

Marilyn (Age 56)

Sioux Falls, SD

"I have been using Age Intervention Regeneration Booster for four weeks now and I've already noticed an AMAZING glow on my face! My skin is much plumper and fuller, and has a lot less wrinkles. I am 63-years-old and one of my clients asked me if I had a face lift! The hand that I use to apply Regeneration Booster looks completely different than my other hand, too. The skin tone on that hand is completely even toned and wrinkles are gone. All of my older clients are now buying Regeneration Booster because of MY incredible results!"
