

SKIN CARE MANAGEMENT SYSTEM™

Exclusively by JAN MARINI SKIN RESEARCH®

Is Your Skin On The System?

JANMARINI
SKIN RESEARCH®

SKIN CARE MANAGEMENT SYSTEM™

"I have been a product researcher for over 35 years. In 1995, I recognized the emerging clinical and consumer demand for a comprehensive daily skin care program to reverse the visible signs of common skin concerns such as:

- photoaging
- acne
- rosacea
- skin discoloration
- and preventative skin care.

In order to introduce a program that would be both reactionary and proactive, I created the professionally dispensed Skin Care Management System™, and Skin Care Management System for Men, exclusively by Jan Marini Skin Research.

The Skin Care Management System provides exceptional results for restoring and maintaining flawless, healthy skin. The easy 5-step system utilizes layered technology to achieve:

- optimum compatibility of topical agents
- formulation stability
- and remarkable efficacy.

Regardless of your personal skin care challenges and goals, younger-looking, healthier, and glowing skin can be a reality for today and throughout one's lifetime.

I have personally used the Skin Care Management System every day for over 15 years and I am more passionate about its dynamic advantages today than I was at its inception.

Welcome to amazingly radiant and healthy skin. Welcome to the one and only Skin Care Management System from Jan Marini Skin Research!"

Jan Marini

STEP 1: CLEANSE

Bioglycolic® Face Cleanser — a gentle cleanser suitable for all skin types and encourages a soft, smoother and more refined skin texture.

STEP 2: REJUVENATE

C-ESTA® Face Serum or Cream — the first stable lipid soluble topical form of Vitamin C to make the skin less wrinkled, tighter, firmer and overall more resilient.

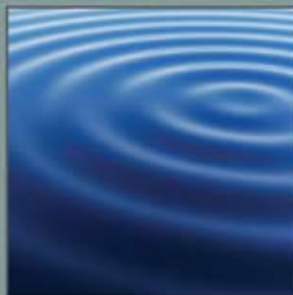

STEP 3: RESURFACE

Bioclear® Face Lotion or Cream — incredibly dynamic products that target multifaceted resurfacing needs for all skin types.

STEP 4: HYDRATE

Age Intervention® Face Cream or Transformation Face Serum or Cream — Our superb hydrators regulate moisture content, guard against inflammation and greatly enhance skin rejuvenation.

STEP 5: PROTECT

Antioxidant Daily Face Protectant SPF 30 — Combines a cutting edge microscopic sponge encapsulation system, state of the art sun protection, a powerful antioxidant component, and a superb hydrating complex.

KEY SUPPLEMENTAL PRODUCTS

Age Intervention® Enlighten

Discoloration and uneven skin tones can age the look of facial skin just as dramatically as lines and wrinkles. Overly pigmented facial areas that may occur due to melasma, cumulative sun exposure, and ethnicity are some of the most common and difficult concerns to treat.

Age Intervention Enlighten is a remarkable new composition that brightens and encourages the uniform appearance of facial discoloration — even the most stubborn types of pigmentation issues.

Enlighten contains a combination of two exceptional topical agents that address the appearance of facial discoloration. Plus, we have included Retinol, a superior retinoid that discourages the production of excess melanin and assists in resolving the appearance of existing facial discoloration. Retinol is also a potent anti-aging tool that provides a more refined, resurfaced and illuminated facial texture.

Enlighten combines exceptional brightening technology with de-aging agents that result in the refined, rejuvenating and illuminated skin we all want.

Age Intervention® Transitions

Age Intervention Transitions is an extraordinary technology that addresses common female transitional issues. This next-generation formula significantly resolves or minimizes acne breakouts while dramatically improving the appearance of follicle size, fine lines, coarse facial texture and stubborn left over acne discoloration.

Transitions combines acne clearing and prevention with remarkable skin resurfacing and brightening technology. No more resistant acne...just clear, radiantly polished and younger looking skin.

Age Intervention Transitions benefits:

- Helps keep skin clear of new acne blemishes, acne pimples, blackheads and whiteheads
- Resurfaces skin texture for a more refined, polished and radiant look
- Improves the appearance of fine lines and wrinkles
- Assists in diminishing the appearance of acne discoloration for a brighter, more even-toned look

SKIN CARE MANAGEMENT SYSTEM™

Exclusively by MARINI SKIN RESEARCH®

Question:

How often should I use the Skin Care Management System?

Answer:

For the best possible results, it is recommended you use the Skin Care Management System consistently both AM & PM. Omit step 5 in the PM (sun protection).

Question:

How much product should I use when using the Skin Care Management System?

Answer:

Apply sparingly. A little product will give a lot of coverage. In general, a few drops of serum or less than a "dime" size of cream is adequate for the entire face. You may need a little additional product for the neck and chest.

Question:

Should I apply all products to my entire face? Can I use the Skin Care Management System on my neck as well?

Answer:

All products in the Skin Care Management System should be applied to the entire face and neck with the exception of Bioclear. It is recommended that Bioclear not be applied to the lower eyelids or neck more than 1 to 2 times per week.

Question:

Is it OK to use make-up over the Skin Care Management System?

Answer:

Many individuals report that their skin looks glowingly rejuvenated without make-up. In any case, the Skin Care Management System is an exceptional base for any make-up application and will extend that fresh, just applied look.

Question:

How long do the products included in the Skin Care Management System last?

Answer:

On average, your Skin Care Management System should last for 4 to 6 weeks. However, users report that the cleanser may last up to 12 weeks.

Question:

Is it common to have a skin break-out associated with usage of the Skin Care Management System? What can I expect when first using the system?

Answer:

No. However, individuals suffering from acne may experience some mild transitional breakouts as their acne clears. These should resolve more rapidly and acne clearing should get progressively better over a period of 4 to 12 weeks.

Question:

How soon will it be before I should expect to see some improvements in my skin's appearance?

Answer:

Every person has specific goals along with their own unique skin characteristics. Several factors play a role in how you will respond. Most individuals will begin to see measurable improvement in a short period of time. As you continue to consistently use the Skin Care Management System, your results will get progressively more noticeable.

Question:

What if I feel stinging?

Answer:

It is common to feel a mild stinging sensation and experience possible mild redness the first few times the products are applied. This is normal. If stinging and/or redness persist, contact your provider for assistance.

Question:

If I have other skin concerns such as adult acne or pigmentation issues, can I see benefits from the Skin Care Management System?

Answer:

Yes, the Skin Care Management System is designed to effectively target a host of common skin concerns. In addition, JMSR has additional products that may more aggressively address issues such as acne or skin discoloration. Your provider is educated to recommend the JMSR products that can appropriately augment your program in order to resolve your concerns.

Question:

Does JMSR offer products not specifically targeted to the face?

Answer:

The JMSR product line has been designed to address a broad range of issues. Among these are solutions for aging, thinning or sparse eyelashes, aging hands and body products including sunless tanner.

Read What Patients Are Saying About The Skin Care Management System

"The Jan Marini Skin Care Management System is a revolutionary program that has completely transformed not only my skin but my life. My skin is clear & healthy. I tried many products before but never obtained the quality and satisfaction that I do with Jan Marini. I am more confident knowing my skin is radiant & beautiful. There is truly no other product that could surpass Jan Marini."

Lindsay Lord
San Jose, CA

"Before using Jan Marini products, my skin was a mess. I had tons of melasma and it looked like I had dirt all over my face. I used other lightening products in the past and never got the results as fast as when I used Jan Marini, including Age Intervention Enlighten and the Skin Care Management System. I get compliments daily from friends and strangers alike."

Elisha Higuera
Huntington Beach, CA

"I have been using the Jan Marini Skin Care Management System for a little over 4 months now, but noticed a difference in my skin within the first two weeks. My skin looks healthy, luminous, and youthful. I am often complimented on my skin and youthful appearance, and that makes it very easy to discuss the products with our patients. And it sounds crazy, but I enjoy touching my face – it just feels so soft and smooth! In fact, since I began using the Skin Care Management System I have also noticed that my makeup now lasts all day instead of "fading" throughout the day. Thanks!"

Brandi Allen
Marketing Director, Professional Eye Associates
Dalton, GA

"I have been using the Skin Care Management System for six months now. I saw improvement after one week. I work for plastic surgeons where I have tried every system. The Skin Care Management System by Jan Marini is by far THE BEST!!!!!! The change is incredible."

Peri Basel
Patient Care Coordinator, Plastic and Reconstructive Surgery
Purchase, NY

"This is the first product that I have used that has actually made a remarkable difference in my skin. The Jan Marini Skin Care Management System has addressed my uneven skin tone, my skin laxity, my fine lines and wrinkles and my rosacea. For the first time in my life, I have people comment that I have beautiful skin!"
