

Auriderm XO

Helping bruises
look better faster

Auriderm XO is a unique Vitamin K Oxide emulsion gel formulated to help bruises look better faster.

Auriderm XO helps the bruises that can occur after some cosmetic procedures look better faster by using Vitamin K Oxide, an essential component of the natural bruise healing process. The Vitamin K Oxide is encapsulated in single layer liposomes called nanosomes. These consistently deliver it through the skin's epidermis to the site of the bruise.

Auriderm XO results

The image below shows the results achieved using **Auriderm XO** after an upper eye lid blepharoplasty versus an alternative product.

Eye area treated with **Auriderm XO**

Eye area treated with Vitamin K gel

After 6 days there was a **54%** improvement in the eye area treated with **Auriderm XO**
