Cernor

Improves the look of dark circles

Cernor - improves the look of dark circles

The transparency of the skin and the presence of damaged blood vessels are two of the main causes of dark circles. Genetic predisposition, ageing and sun damage greatly influence severity.

Cernor XO Emulsion Gel

A unique combination of Vitamin K Oxide and light reflecting minerals to improve the look of dark circles.

Cernor XO

consistently delivers Vitamin K Oxide, essential for blood vessel repair through the skin's epidermis.

Cernor XO's

light reflecting mineral complex reduces skin transparency and the visibility of pigments and blood vessels.

Directions for Use

Apply a small amount of **Cernor XO** emulsion gel morning and evening to the dark circles under the eyes and gently massage until totally absorbed or use as directed by your aesthetic professional.

Cernor XO emulsion gel has a 6 month shelf life once opened. Use before expiry date.

Cernor Coverstick

A highly effective moisture rich concealer specifically designed to camouflage discoloration and dark circles under the eyes.

Expertly formulated with Vitamin K Oxide and carefully selected light reflecting and tinting agents **Cernor Coverstick** is an easy to apply, long lasting coverstick that provides optimum results and can enhance your natural skin or make-up tone.

Directions for Use

Apply to cleansed skin or over make-up, then blend in using fingertips for a natural looking cover and optimum results.

For optimum results use in conjunction with **Cernor XO** emulsion gel. Apply **Cernor XO** emulsion gel to cleansed skin, allow to absorb then apply **Cernor Coverstick**.
