

SIZE AND WEIGHT

HEIGHT: 3.60 inches (91.03mm)
 WIDTH: 2.60 inches (66.10mm)
 DEPTH: 1.30 inches (34mm)
 WEIGHT: 3 ounces (85g)

OUTPUT

42 High output super luminous Blue LEDs
 40 High output super luminous Red LEDs

POWER

45 mW per cm²

IN THE BOX

- Clear Rayz Acne Tool
- Instruction Manual
- 100-240v power adapter
- Travel Pouch

"My 18 year old daughter, Isabelle, has had problems with terrible acne and cysts. Nothing she tried got rid of her physical and emotional discomfort. Then we discovered the Clear Rayz! Isabelle's skin is clearing up and her painful cysts are gone. Thank you so much for such an amazing product!"

—Sylvie, mother of Isabelle

WHO WE ARE

**qua-sar (kway-sar): any class of celestial objects that resemble stars but whose large redshift and apparent brightness imply extreme energy output.*

Quasar Bio-Tech was founded in 2005 on the belief that offering premium products with outstanding customer care was the only way to do business. Today, our continued success is due in large part to you— our clients. We would like to thank you for your continued support of our endeavors.

Located in Sarasota, FL since 2007, we pride ourselves in being a small business with big dreams to continue offering skin care products that aid our clients in feeling and looking their best. We are extremely proud to manufacture our products here in the United States.

Quasar Bio-Tech looks forward to your continued support, suggestions, and success stories.

CUSTOMER CARE

Quasar Bio-Tech has been advising skin care professionals and consumers about the remarkable results and benefits of light therapy technology since 2001.

CLEAR RAYZ

Meet the Next Generation of Acne Care

KILL THE ACNE. HEAL THE SKIN.

BLUE LIGHT
 KILLS BACTERIA
 REDUCES ACNE

DUAL-SIDED
 ERGONOMIC DESIGN
 2-IN-1 TOOL

RED LIGHT
 REDUCES VISABLE ACNE
 REDUCES INFLAMMATION

TWO SIDES

ONE TOOL

HOW IT WORKS

BLUE LIGHT

Blue LED light activates naturally occurring chemicals to combat the bacteria which cause acne breakouts.

BENEFITS

- Kill acne bacteria
- Clear existing breakouts
- Prevent future breakouts
- Gentle enough for all skin types and tones
- Dermatologist recommended
- Eliminate costly chemicals and harsh topical products
- Blue light treatment is completely safe, and has no side effects, and contains no UV light

RED LIGHT

Red LED light penetrates deeply into the skin to combat the inflammation that accompanies breakouts.

BENEFITS

- Reduce inflammation
- Prevent future scarring
- Gentle enough for all skin types and tones
- Clinically proven results
- Dermatologist recommended
- Eliminate costly chemicals and harsh topical products
- Red light treatment is completely safe, and has no side effects, and contains no UV light

CLEAR RAYZ SCIENCE

Studies have recently demonstrated that therapy using red and blue light offers substantial benefits. Previous methods focused on either medication (Accutane or Retin-A) or topical products. These products are costly and inconvenient to use and may produce side effects.

By comparison, clinical studies have demonstrated that red and blue light therapy is highly effective with no side effects. Light therapy treatment is completely natural, requires no harsh medication, and dramatically improves the appearance of blemished skin.

WHAT IS THE PURPOSE OF RED LIGHT AND BLUE LIGHT?

The blue light (415-420 nanometer wavelength) interacts with the p. acnes bacteria generating oxygen singlets. These oxygen singlets kill the acne bacteria.

The red light (630 nanometer wavelength) dramatically reduces inflammation and the visible signs of acne.

OUR COMMITMENT

Quasar Bio-Tech is committed to employing science and technology to the treatment of aging and acne. Through our website, newsletters, and professional staff, we will continue to update our research findings and user experiences, allowing you to make informed choices in managing your personal skin care.
