

Having been in the beauty industry for over 16 years as a Beauty Therapist, Make up Artist and Beauty Editor it takes a lot to turn my head when it comes to the latest 'miracle product' -however that is exactly what Collagen Shots did! I kept hearing the catchy name being mentioned followed by much excitement on shoots, PR events and through my clients and colleagues to the point where I had to get in touch with the founder Kathryn to find out what all this beauty buzz was about.

Kathryn sent me a months supply of Collagen Shots to trial and told me the science behind the brand- being a bit of a sceptic when it comes to these 'health drinks' I was keen to trial after a lovely conversation with a lady who clearly knew her stuff when it came to beauty.

I was very much inspired by Kathryn and her beauty knowledge and started taking the shots straight away. Wow, they are amazing, It's so refreshing to still get excited by new stand out products that not only capture attention due to individuality, but that actually work! Myself and now all my clients are hooked, and I am so happy to have met Kathryn who clearly has lots of other beauty remedies up her sleeve- all of which I can't wait to try! Your hair, skin and nails will thank you after as little as 4 weeks!
