

DermaTx™

ADVANCED SKINCARE

REJUVENATE

Professional grade corundum crystals - the most widely used and most abrasive material for microdermabrasion procedures.

Lactic Acid - a powerful exfoliating ingredient that helps lighten and brighten the skin. Hydrates and reduces the appearance of wrinkles and other signs of ageing.

Vitamin C - An antioxidant helps to promote skin rejuvenation by reversing free radical damage caused by the sun and natural ageing. It also aids in stimulating collagen production within the skin and may help lighten sun spots.

Vitamin E is one of the most powerful antioxidants. It helps to protect and repair your skin and can also help improve skin hydration.

Pentavitin® - A highly effective moisture regulator under the driest of conditions. Where most moisturising agents would lose their effectiveness, Pentavitin® continues to be active and effective helping with dryness and irritation.

Avenacare™ (Oat Beta Glucan) - moisturises dry skin and offers specific benefits in improving the skin's appearance. It helps to soothe skin and reduce the appearance of skin redness as well as fine lines and wrinkles.

Antileukine 6® is an innovative immunological filter. It helps reduce redness, itching, irritation and inflammation while providing a unique DNA protection against the sun and stress reactions.

Paraben free
