

Power Lift ☹️⚡️💧💧 Anti-Wrinkle Ultra Rich Concentrate

FAQ's

What percentage of peptides does Power Lift contain?

Power Lift contains a total of 25% peptides, a total four, two of which are collagen-boosting peptides and two which are wrinkle relaxing.

When should I apply Power Lift?

Power Lift can be applied on clean skin either morning and night or just at night as a rich night cream. Applying Power Lift over Serum works perfectly but not required for superior anti-aging results. Twice a day use is appropriate for those with dehydrated skin.

Why does my skin feel greasy a few hours after I apply Power Lift?

Power Lift is very concentrated. Less than a pea-sized amount is sufficient to hydrate the skin. Throughout the day Power Lift will continue to hydrate the skin since it contains humectants that pull hydration into the skin, If too much is applied, skin will feel over hydrated.

Will Power Lift cause me to break out with so much hydration?

No. Power Lift will help moderate oil levels to what's appropriate. In fact, many who have had problematic skin in the past, have found they have clearer skin after using Power Lift regularly.
