

PAPULEX®

Indication:

- Papulex® is a line of cosmetic products specifically targeted at cleansing, protecting and keeping acne prone skin in good condition
- Papulex® can be used alone or in combination with conventional acne therapy
- Papulex® represents a complete daily management of signs and symptoms of light to moderate acne
- The Papulex® line is an original and exclusive concept based on a unique combination of ingredients

The Papulex® line is available as a **cream, lotion, Isocorrexion, gel** and **cleanser**.

Products Benefits:

- No bacterial resistance - effective alternative non-antibiotic treatment with no risk of inducing bacterial resistance or side effects
- Contains 4% Nicotinamide - as effective as topical clindamycin and has anti-inflammatory properties
- Contains zinc PCA, which has a sebum regulating effect
- Anti-bacterial adhesive activity on P. acnes
- Non comedogenic - does not block pores
- Non photosensitizing (no adverse reactions to sun exposure)
- Fragrance free, reduced risk of allergy
- Anti-shine effect thanks to mattifying agents
- Hydrates without greasiness

Key Ingredients:

ANTI-INFLAMMATORY	
Nicotinamide ^{1,2} 4%	Inhibits histamine release by mast cells
Cream Isocorrexion Lotion Gel Cleansing Gel	Inhibits the neutrophilic chemotaxis and secretion of inflammatory mediators
	Blocks histamine receptors, and no substances that can increase the inflammatory process are released
	Suppresses lymphocytes transformation into lymphoblasts, preventing their migration to inflammatory site
ANTI-BACTERIAL BARRIER	
Active A.B.A. Anti-Bacterial Adhesive Cream Isocorrexion Lotion Gel Cleansing Gel	Blocks proliferation of P. acnes by inhibiting its adhesion to corneocytes accumulated in the follicle
	Molecular interaction between the adhesin present on the surface of the bacteria and the receptors of the cells cannot take place
SEBUM REGULATING ACTION	
Zinc PCA	It reduces secretion of sebum by its inhibiting action on 5- α -reductase
Cream Isocorrexion Lotion
