

don't just relieve
redness, prevent it

**Your one-step solution to
eliminate redness and sensitivity**

dual action
redness relief

*atténuation des rougeurs
par double action*

PCA skin®

PCA skin®

trust the experts

the first of its kind

Double the breakthrough

The first product to target not just one concern, but two, for immediate and long-term relief.

Reduce redness

- Dimethyl sulfone and silymarin work together to reduce redness, improve hydration and soothe skin
- Bisabolol helps reduce inflammation and calms the skin
Inflacin® reduces irritation from topical ingredients

Improve barrier function

- Ceramide NP supports the renewal of the skin's natural protective layer and protects against moisture loss
- Niacinamide improves barrier function and reduces transepidermal water loss
- Panthenol hydrates and works alongside niacinamide to improve skin barrier
- Inflacin® reduces transepidermal water loss and has been shown to reduce barrier damage

Dual Action Redness Relief is non-irritating, non-sensitizing and hypoallergenic, proven by the Repeat Insult Patch Test (RIPT).

patented OmniSome delivery

Increased efficacy and patient compliance

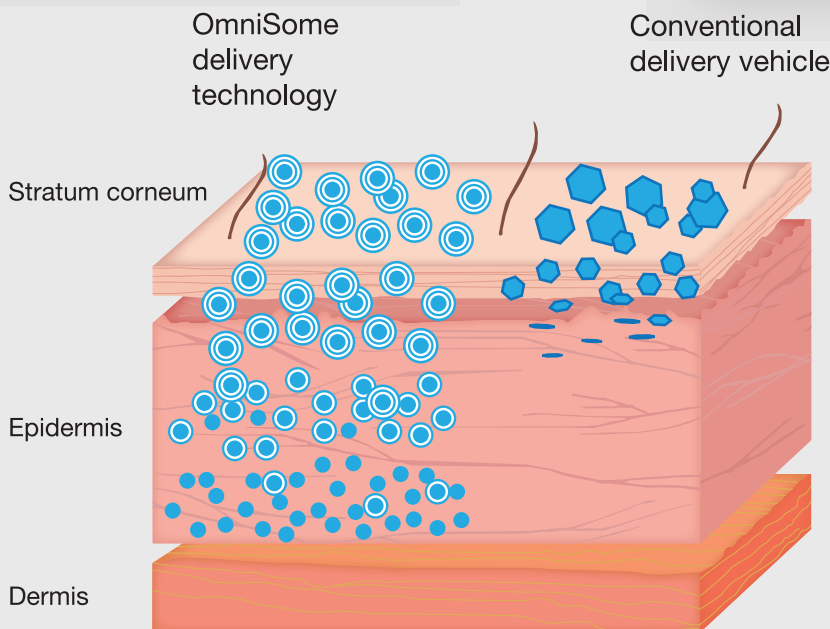

Using OmniSome delivery technology, key ingredients are released deeper into the skin and time released over ten hours. The result is noticeably healthier skin, with significantly less redness and improved barrier function.

Patented OmniSome technology protects and carries ingredients deep into skin and **time-releases over ten hours.**

Increases stability, efficacy and penetration of the encapsulated ingredients.

Larger ingredient concentrations are protected from degradation, **maximizing potential results.**

Reduces irritation and discomfort caused by certain topical ingredients.

provides instant relief

Correct redness and sensitivity

Treat the signs of redness and sensitivity.

Fact: Caused by any number of factors, redness and sensitivity can be challenging to effectively treat.

Introduce a product that starts treating immediately on contact with the skin.

- Instant relief from redness and sensitivity
- Works to repair the skin's natural barrier function
- Hydrates and soothes dry or irritated skin
- Calms the skin during and after professional treatments

a long-term solution

Prevent redness and sensitivity

Stop future redness and sensitivity.

Fact: Most redness relief products only address inflammation in the skin, overlooking other causes of redness and sensitivity.

Give your patients something to improve the health of their skin later, as much as it does now.

- Inhibits the skin's inflammatory response with powerful ingredient combinations
- Lipid restoration for a stronger skin barrier
- Dramatic reduction in transepidermal water loss (TEWL) for long-term hydration
- OmniSome delivery technology carries ingredients deeper into the skin

see the results

Visible redness reduction

When used at home and in professional treatments, **Dual Action Redness Relief** has shown impressive reduction in redness and sensitivity. The result is stronger, healthier skin that rebounds faster.

Before
