

Optimal Hydration, Reinforced Protection and Complexion Correction all in one.

We all know that whatever the weather UV rays reach the skin year round and an SPF should be a staple part of our daily regime.

As we become savvier about how the sun affects our skin on different levels, the need for SPF's that go beyond standard UVA/UVB protection is paramount.

A next generation SPF, the expert day cream works on four levels to **hydrate, offer advanced protection, revitalise and restructure in one**, leaving **skin protected** whilst **addressing deeper skincare concerns**.

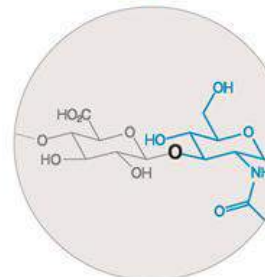

RHA resilient hyaluronic acid®

The core know-how of TEOXANE. This patented cross-linked hyaluronic acid offers greater benefits applied topically than basic hyaluronic acid: **Optimal hydration to visibly smooth and plump the skin⁽¹⁾.**

Dermo-Restructuring Complex Reinforced protection

A unique selection of 8 amino acids, 3 anti-oxidants, 2 minerals and vitamin B6. **With antioxidant supplements and hyaluronidase inhibitors (Glutathione and Alpha Lipoic Acid)⁽²⁾.**

NovHyal

A natural constituent of hyaluronic acid, it boosts its synthesis⁽³⁾.

Optimal Hydration

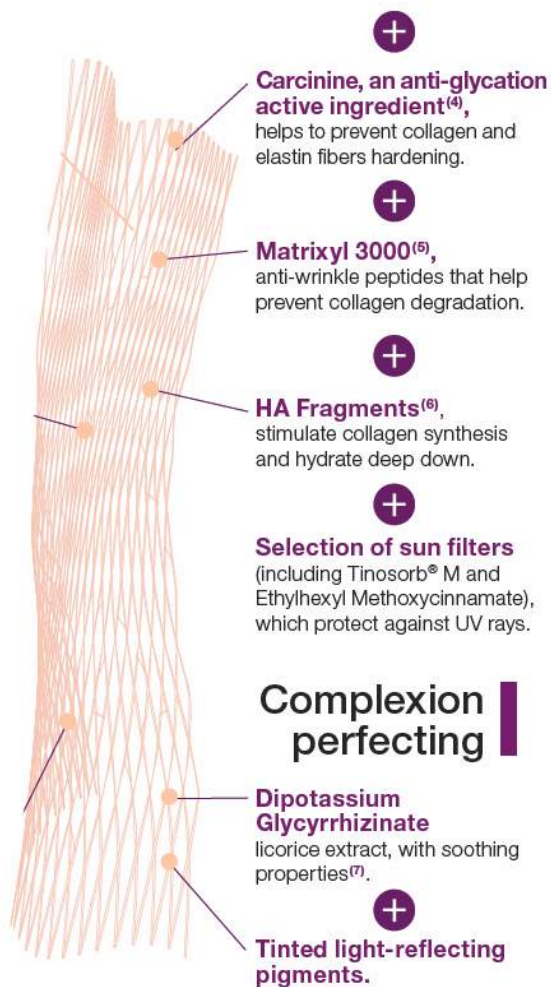

Prolonged sun exposure can cause water to evaporate from skin and dehydrated skin can take longer to heal and be more susceptible to environmental aggressors.

Advanced Perfecting Shield SPF30 contains Teoxane Cosmeceuticals' core formula ensuring skin retains optimal hydration levels using the following:

Resilient Hyaluronic Acid (RHA): This patented cross-linked hyaluronic acid offers greater benefits applied topically than basic HA. It provides optimal hydration to visibly smooth and plump whilst strengthening the skin's barrier.

Dermo-Restructuring Complex: 3 antioxidants, 8 amino acids, 2 minerals and vitamin B6, with additional glutathione and alpha lipoic acid revitalises and protects from oxidative stress.

NovHyal: Restructures by stimulating HA production.

Complexion Correction

Advanced Perfecting Shield also contains **tinted, light reflecting pigments** to correct and unify the skin giving a healthy appearance whilst creating a perfect make-up base.

Reinforced Protection

The formula also incorporates solar filters including TINOSORB® (M + Ethyl Hexylmethoxycinnamate), antioxidants, carbinine, Matrixyl 3000, liquorice extract and potentiated HA + Sodium PCA to provide next level protection which:

- Inhibits hyaluronidase reaction (the enzyme causing the degradation of hyaluronic acid)
- Has an anti-glycation effect (one of the three fundamental mechanisms of ageing. Sugar molecules bind to collagen and elastin and rigidify it increasing wrinkles)
- SPF30 Daily Sun Protection from UVA/UVB rays
